Company Profile

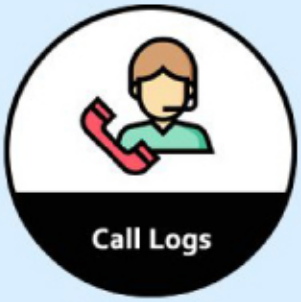

H.R. Software Solutions is pleased to submit this proposal for eTracker to support you in achieving your goals for improving employee efficiency. We have delivered Development / Web solutions / Marketing Solutions for our customers as per their expectations. Our business oriented solutions to improving the customer experience through convenience, accuracy of orders, and timely delivery.

Product Guide & Features

- eTracker's is the most reliable and user-friendly application for watching over your your employees' cell phone use. This mobile monitoring software runs in an invisible mode providing you with across-the-board logging features so that you can remotely track all activity that takes place on the monitored phone, from calls to calendar updates. Call history, text messages, emails, call recordings... all immediately sent from the tracked phone right to your secure online account!

- Capability to identify activity away from the system.

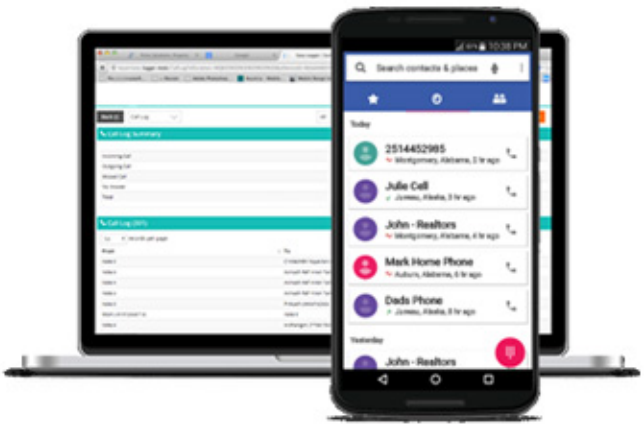

Core Features

Call Logs

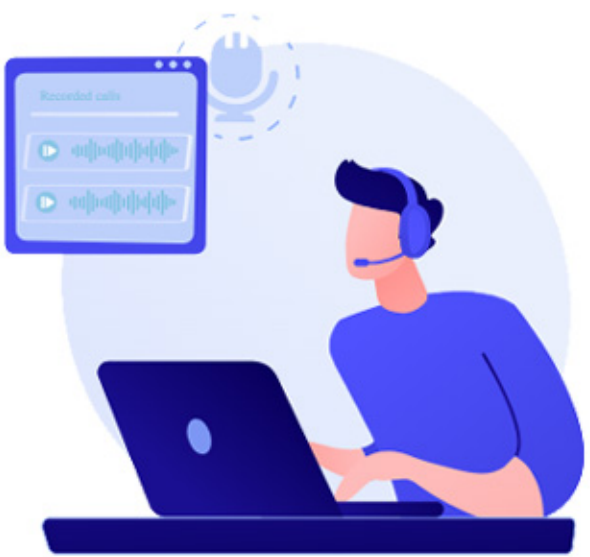

eTracker's allows you to receive a chronological log of all incoming and outgoing calls. Instantly see:

The time of the call
- Its duration
- The number of calls made
- The device number or a contact's name (provided it is saved in the device's address book)

Why will you find it useful?
Sometimes knowing what your family members or employees are talking about can prevent real trouble. Bullying or leaking company's information are just a few scenarios when this feature comes in handy. All call logs are neatly organized into your Control Panel

Call Recording

eTracker's allows you to remotely record calls made from or received by your target device.

- Instantly see a recording of all incoming or outgoing calls.
- Set up a predefined number you wish to record calls to or from.
- Listen to the recording either directly from you Control Panel or download them to your PC.

Why will you find it useful?
There are many instances when you may get suspicious of harmful or unwanted behavior at home or work. By recording calls with E-Track you will get the needed evidence to be able to confront the situation in a constructive way. Currently available on Android smartphones and tablets only.

Monitor All Incoming & Out Going Message

eTracker's tracking software empowers you to monitor all incoming and outgoing messages on the target device with complete accuracy and discretion. Whether it's a simple SMS or a multimedia message containing images, videos, or audio files, eTracker captures every detail — including sender and receiver information, message content, date and time stamps, and presents it to you in a well-organized, easy-to-read format. Even if the user deletes a message right after sending or receiving it, eTracker ensures that it remains accessible to you through secure cloud storage. The software operates in stealth mode, making it completely undetectable to the phone user, and updates message data in real-time, so you never miss a thing. Perfect for parents who want to safeguard their children, employers ensuring responsible use of company devices, or individuals seeking to build trust and transparency, eTracker gives you unmatched control over mobile communication tracking, all from a single and powerful dashboard.

Sent/Received text messages

eTracker's allows you to view any text message sent from or received by the target device.

You can instantly see:

- The content of each text message
- Whether the text message was incoming or outgoing
- Sender/Recipient of the text message
- The date and the time of the text message

Why will you find it useful?

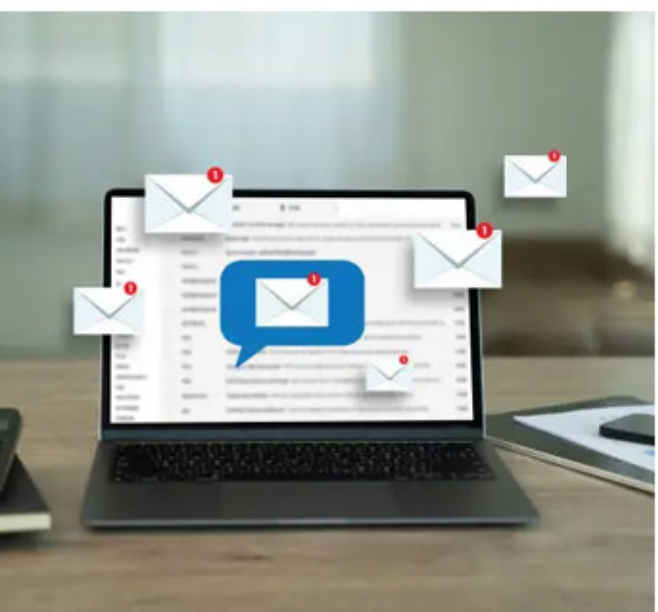

Sometimes knowing what your family members or employees are texting can prevent real trouble. Bullying or leaking company's information is just a few scenarios when this feature comes in handy. All text messages are neatly organized into your Control Panel and you can access them anytime.

Track Outgoing & Incoming Mails

eTracker's email tracking feature allows you to monitor all incoming and outgoing emails on the target device with complete transparency and efficiency. Whether it's a work email or a personal one, eTracker gives you access to the email content, subject line, sender and recipient details, date and time stamps, and even attachments, all from a secure and easy-to-use dashboard. The software ensures that employees are using company resources responsibly and not wasting productive hours on personal communication. You can prevent data leaks, ensure compliance, and maintain professionalism in your organization by having clear visibility into all email exchanges. It operates silently in the background without alerting the user, providing you with real-time updates and complete confidentiality. Ideal for business owners, managers, and IT administrators, eTracker empowers you to protect your company's digital environment while respecting individual privacy through ethical and secure monitoring.

Incoming/outgoing Emails

eTracker's allows you to check email history from the target device

Instantly see:

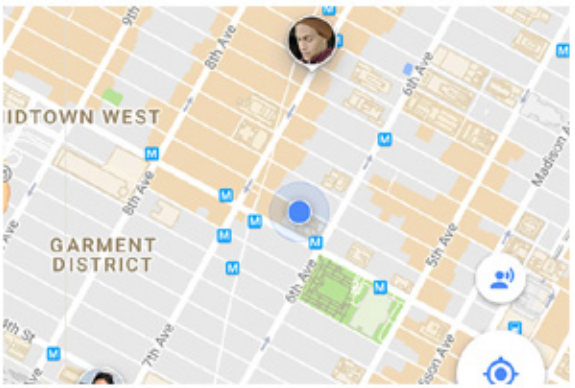

- Content from all incoming and outgoing emails
- The date and the time of the email
- Name and contact information of the sender/recipient (provided it is saved in the address book)

Why will you find it useful?

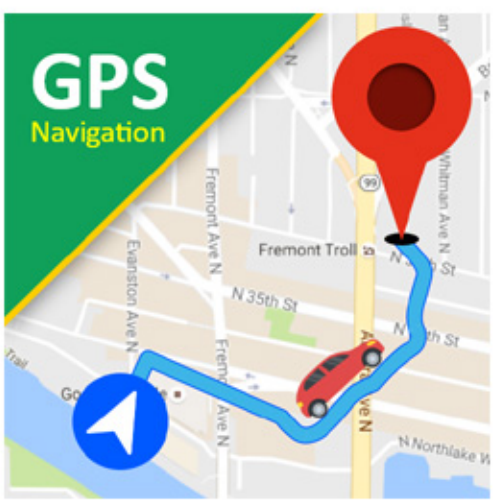

Sometimes your child may be hanging out with the wrong crowd, or your employee may be spending too much time talking to competitors behind your back. eTracker's gives you an opportunity to put a stop to this.

Track Exact Location on Geo-Map

eTracker's GPS tracking feature, you can monitor the exact real-time location of the target device on an interactive geo-map with pinpoint accuracy. Whether you're tracking an employee, a child, or any authorized user, this tool ensures you always know where they are and where they've been. The software provides continuous location updates, movement history, and timestamps, allowing you to verify if someone is genuinely stuck in traffic, at a meeting, or off-route. eTracker goes beyond basic GPS tracking by offering geofencing capabilities, which alert you when the device enters or leaves predefined zones. All data is stored securely and can be accessed from your personal dashboard anytime. This feature is especially valuable for businesses with field employees, delivery personnel, or for parents wanting to ensure their children's safety. Discreet, reliable, and highly accurate, eTracker turns your device into a powerful location intelligence tool that brings peace of mind and accountability together in one place.

Current GPS Location

eTracker's allows you to easily and non-intrusively monitor the location of your employees.

Instantly see:

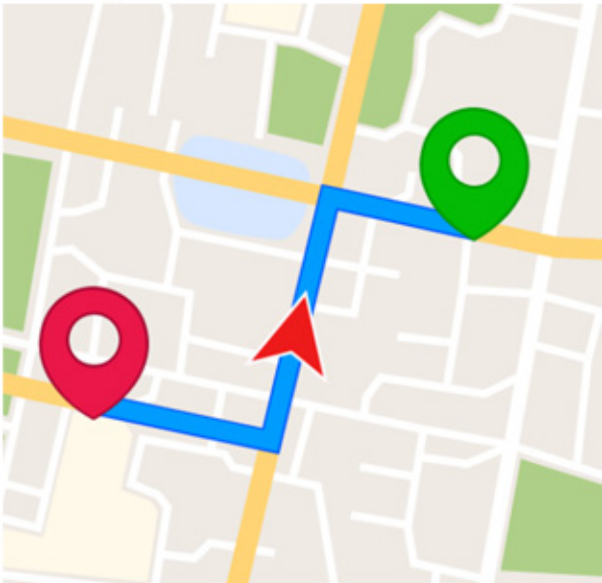

- Instantly see the current whereabouts on a comprehensive map.
- Check the detailed route history within a specified period of time.
  Identify the location even when GPS is not avail able.
- Access this information directly from your Control Panel.

Why will you find it useful?

Sometimes you need reassurance that your kids or your staff is where they are supposed to be. Keeping tabs on your child's whereabouts can be one of the ways to protect him from harm and danger. For business owners eTracker's offers a great solution to track whether your employees are attending meetings outside of the office or utilizing this time for personal use.

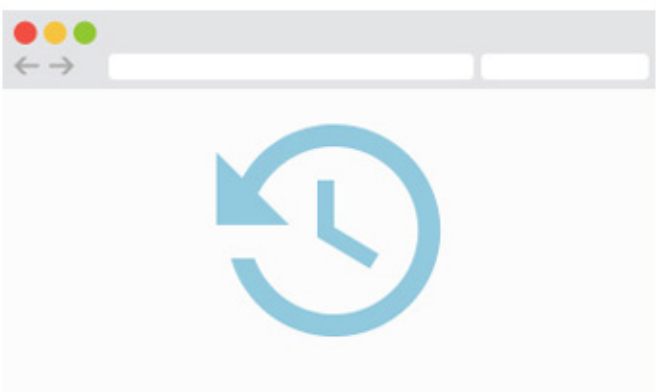

Find out if They Leave Safe Areas

eTracker's lets you marks areas on a map as 'safe'. If the target phone leaves these areas, you will be notified instantly. With eTracker, you can:

- eTracker's lets you marks areas on a map as 'safe'. If the target phone leaves these areas, you will be notified instantly. With eTracker, you can:
- Mark 'safe' areas on a map shown in the eTracker's control panel.
- If the target phone crosses the boundaries set by you to leave
- the 'safe' area, you will be notified instantly.
  You can choose to receive notifications via email, via SMS message or both.

Check Web Browser History

eTracker's monitor internet use view all URLs visited by the user in cell phone browser. Check what they're up to online by rummaging through their browsing history.
Browsing History eTracker's allows you to monitor and create the record of all Internet activities taking place in the target device's browser.

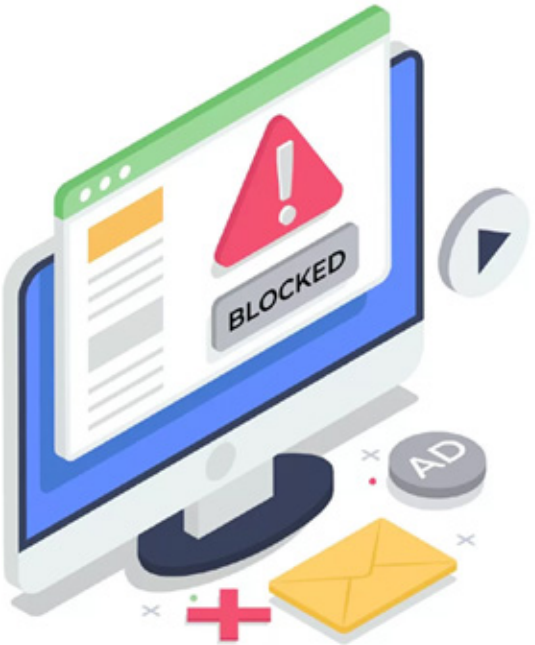

- See the URLS of the visited websites.
- See when each website was accessed.
- Analyze this information directly from your Control Panel.

Why will you find it useful?
Sometimes you need to know whether the websites your children are visiting are safe, or whether your employees are spending their office hours productively. By monitoring Internet activities on the target device, you can know exactly what's going on and take necessary actions.

Blocking Websites

eTracker's allows you to block access to websites that may contain harmful content or contradict your corporate policy. Filter online content.

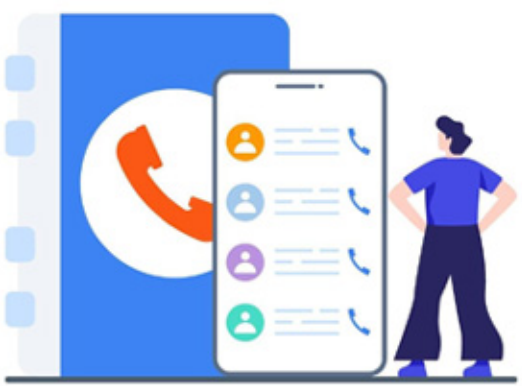

- Filter online content
- Block undersired or dangerous websites
- set up time when access to certain websites remains restricted

Why will you find it useful?

Sometimes you wish you had a great tool to limit the exposure to online risks and improve the productivity of your teams. By blocking access to any website, that you think may harm your child or your business, eTracker's helps you provide a safer home or office

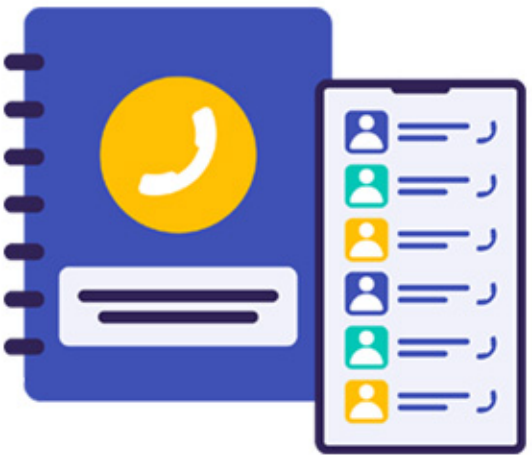

Monitor all the Contact

eTracker's monitor all contacts feature, you gain complete oversight of every name, number, email address, and note added or modified in the target device's address book, as well as every appointment, reminder, and event logged in its calendar, all from a single, intuitive dashboard. As soon as a new contact is created or an existing entry is edited, eTracker captures the full details (including contact photo, company information, and custom fields) and securely uploads them for your review, likewise, any calendar entry,be it a meeting, birthday reminder, or recurring task. It is logged with title, description, location, attendees, and time stamps, so you can verify schedules, spot inconsistencies, or ensure compliance with company policies. Operating silently in the background, the app provides real time updates and maintains a complete history of all changes, even if entries are deleted or altered later. Ideal for HR teams, managers, or parents who need to safeguard organizational integrity and personal safety, this feature empowers you to monitor and audit contacts and events effortlessly, without ever raising suspicion.

Contacts

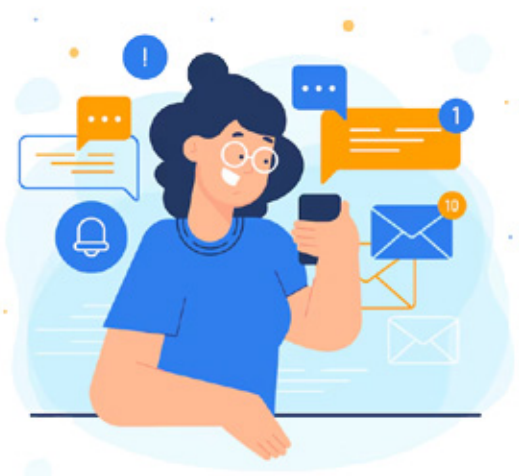

eTracker's logs in every entry in the target device's address book, which can be viewed via the Panel.

- View all the names and the numbers stored in the address book.
- See other details, like addresses, emails, professional positions, etc.

Why will you find it useful?
There are days when you wish you knew more about who your children are hanging out with or your employees are meeting. eTracker's puts you back in the driver's seat as it lets you screen for any suspicious entries on the target device.

Intercept Instant Messages

eTracker's powerful instant message interception feature allows you to discreetly monitor and record all conversations taking place on popular messaging platforms such as WhatsApp, Instagram, Facebook and more. Gain full access to sent and received messages, including text content, contact names, profile pictures, timestamps, and even multimedia files like photos, videos, and voice notes shared during chats. Whether it's a one-on-one conversation or a group discussion, eTracker captures every detail and securely uploads it to your private dashboard—even if the messages are later deleted from the device. You can also track usage frequency and identify communication patterns to better understand how the target user is interacting online. Ideal for employers monitoring company devices, parents ensuring safe digital behavior, or individuals maintaining trust, this feature operates in stealth mode for undetectable, real-time supervision across multiple instant messaging apps—all without needing to root or jailbreak the device in many cases. Stay informed, stay protected, and take control of online conversations with

Whats App

eTracker's allows you to monitor some of the most popular communication apps, like WhatsApp.

- Track all WhatsApp chats.
- Access the information directly from your Control Panel.

Why will you find it useful?
Bullying or harmful conversations may be taking place not just by text messages or calls, but through WhatsApp as well. You need to be in the know of what's going on to be able to prevent any potential risks to your family or business.

Record Surrounding's

eTracker's advanced record surroundings feature, your target device can be remotely activated to capture ambient sounds and conversations happening around it—effectively transforming the phone into a powerful, discreet audio surveillance tool. Whether you're concerned about your child's safety, monitoring employee behavior, or simply need to understand the environment someone is in, this feature allows you to listen in on real-world activities without alerting the device user. Recordings are automatically uploaded to your secure dashboard for easy playback, offering valuable insights into situations when traditional call or message monitoring falls short. From casual conversations to background noises, eTracker ensures you never miss a moment of what's happening, even when you're not physically present. Ideal for situations where visual or textual data isn't enough, this tool adds a critical layer of real-time awareness — all while operating silently and undetectably in the background.

Bugging

eTracker's allows you to turn the target device into a bugging tool.

- Bug any type of the environment.
- Set up recording time.

Manage the bugging and access the recording via your Control Panel

Why will you find it useful?
There are many instances when you may get suspicious of harmful or unwanted behavior at home or work, but need proof to be able to confront the situation in a constructive way. Monitoring text messages and checking call logs won't always give you the rock-solid evidence you need. By using the E-Track bugging feature you'll get a clear picture of what's going on.

Monitor Install Apps

eTracker's monitor installed apps feature gives you full visibility and control over all applications and programs installed on the target device. Instantly view a complete list of apps, including their names, installation dates, versions, and usage patterns, so you can easily identify any suspicious or inappropriate software. Whether it's social media platforms, gaming apps, messaging tools, or unknown third-party downloads, eTracker allows you to track how and when these apps are being used. This feature is especially valuable for parents looking to protect their children from harmful content, or for employers ensuring that company-issued devices are being used strictly for professional purposes. By monitoring app activity, you can spot potential risks, prevent data breaches, and maintain a secure digital environment. eTracker operates discreetly in the background, ensuring that all monitoring remains undetected while providing real-time updates via your private control panel. Take charge of device security and responsible usage with this powerful app supervision tool.

View Multimedia Content On Cell Phones

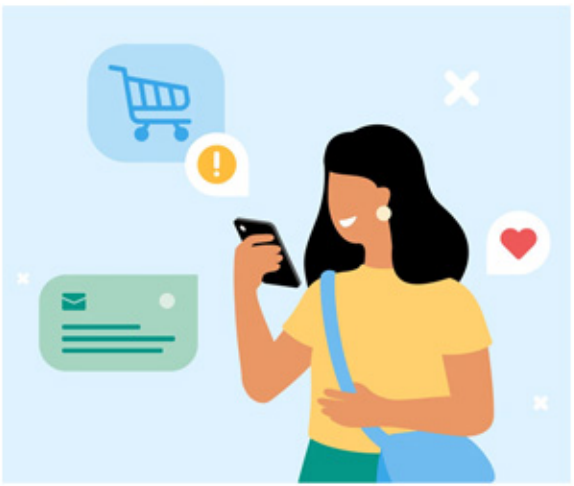

eTracker's multimedia content feature allows you to effortlessly access all photos and videos stored on the target device, giving you complete insight into the multimedia activity of your child, employee, or any monitored user. Every time a new photo is taken or a video is recorded using the device's camera, the content is automatically and securely uploaded to your eTracker dashboard in real-time. This ensures that you stay updated with the latest visual data without any delay or risk of deletion by the user. Beyond just viewing files, you can review metadata such as timestamps and file details to better understand the context of each multimedia item. This tool is invaluable for parents wanting to protect their children from inappropriate content, or for employers who need to ensure company devices are used responsibly. Operating quietly in the background, this feature guarantees full discretion while providing you with instant access to important visual evidence whenever needed. Stay informed, maintain oversight, and keep your digital environment safe with eTracker's multimedia monitoring capabilities.

Remote Control & WIPE Data

eTracker's remote control & wipe data feature offers you critical protection against data theft in case your target device is lost, stolen, or compromised. With just a few clicks from your secure dashboard, you can remotely lock the phone to prevent unauthorized access or completely erase all personal and sensitive data stored on the device, ensuring that confidential information never falls into the wrong hands. This powerful security tool safeguards contacts, messages, photos, emails, and any other important files by instantly wiping them clean when needed—without the device owner's knowledge. Whether you're a concerned parent protecting your family's privacy or a business owner securing company devices, eTracker empowers you to maintain control over valuable data even when you don't have physical access to the phone. Operate discreetly and act swiftly with this essential feature designed to prevent misuse and keep your information safe at all times.

Instant Alerts and Notifications

eTracker's alerts and notifications feature keeps you proactively informed by sending real-time alerts whenever the monitored device interacts with specific contacts or uses particular keywords in SMS messages, emails, or instant chats. You can customize alert settings to track conversations with certain phone numbers, detect sensitive or suspicious words, or monitor activity around critical topics, ensuring you never miss important or potentially problematic communications. These notifications are delivered instantly to your secure dashboard, allowing you to quickly review the relevant messages or calls and take timely action if needed. This feature is invaluable for parents wanting to safeguard their children from harmful interactions, employers maintaining workplace compliance, or anyone seeking peace of mind through vigilant monitoring. With eTracker, you stay one step ahead by receiving targeted updates tailored to your specific monitoring needs—all without alerting the phone user. Explore this feature to gain complete control over communication oversight with precision and ease.

- SIM Change Notifications
- Define suspicious words
