POINT OF SALE (POS)

Fast, Reliable, and Easy-to-Use POS Software

A POS (Point of Sale) system is a solution that helps businesses manage and complete sales transactions efficiently. It's the point where customers make payments for goods or services and receive receipts. A modern POS goes beyond billing — it also manages inventory, tracks sales, monitors employee performance, and stores customer data.

A typical POS setup includes hardware (like barcode scanners, receipt printers, and card readers) and software that handles billing, reporting, and data management. Many POS systems are cloud-based, allowing real-time data access, remote management, and integration with accounting or eCommerce platforms.

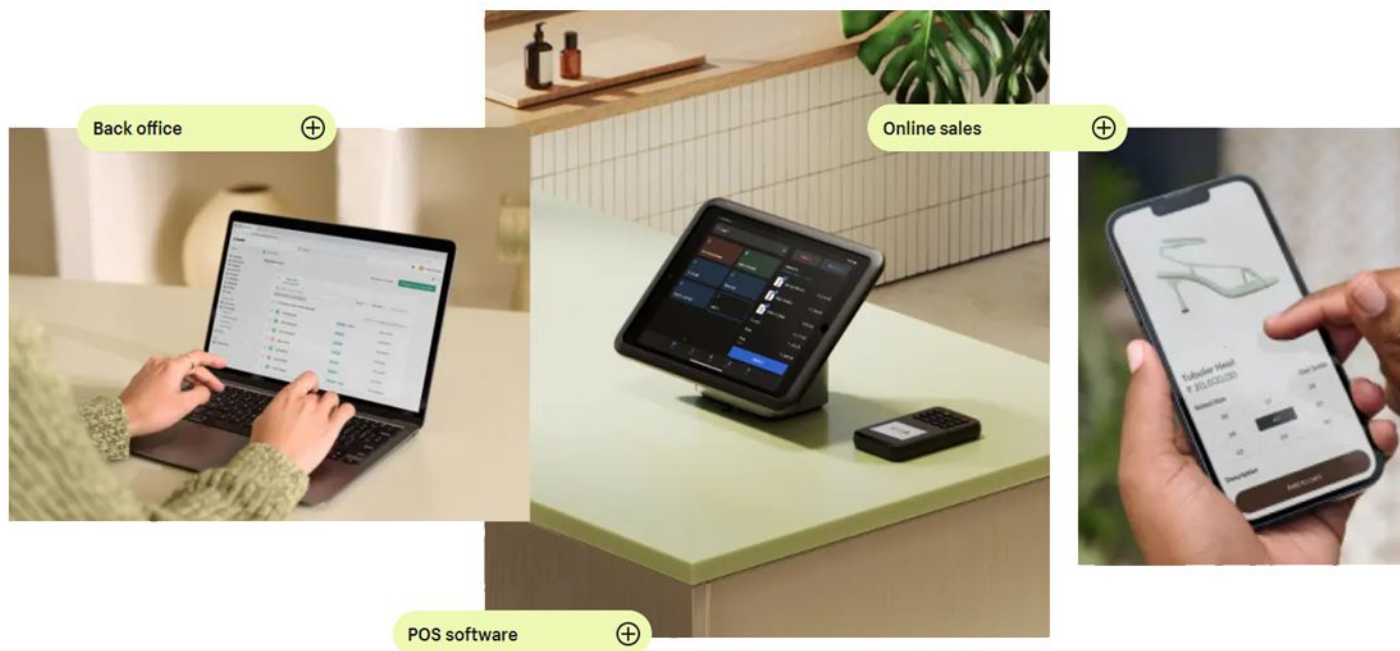

POS systems improve speed, accuracy, and business insight by offering features like inventory control, multiple payment options, and detailed analytics. They are widely used in retail stores, restaurants, pharmacies, and service businesses, helping streamline operations and enhance customer experience.

Everything you need. Out of

the box.

It's the power to sell in person backed by the power to sell online, all by the world's best commerce platform.

Experience the next generation of unified commerce with a powerful all-in-one solution built to transform how you sell and manage your business. Out of the box, it delivers everything you need to start selling instantly — whether it's in your physical store, online shop, or across multiple sales channels. Seamlessly integrate your in-person and digital sales to create a consistent, professional experience for your customers at every touchpoint. With real-time synchronization of products, orders, and inventory, you'll always stay in control of your operations while minimizing manual work and errors. Designed for simplicity and scalability, this system adapts to your workflow — empowering you to focus more on customers and less on complexity.

From intuitive POS tools and secure payment gateways to smart analytics, automated reports, and customer engagement features, every component is crafted to help your business grow faster and smarter. Track performance across locations, understand buying trends, and make data-driven decisions that strengthen your strategy. Whether you're managing a local boutique or a growing retail chain, this platform offers the flexibility, speed, and reliability that today's businesses demand. Backed by the strength of the world's leading commerce technology, it's not just a tool — it's your complete partner for sustainable success, ready to perform the moment you open the box.

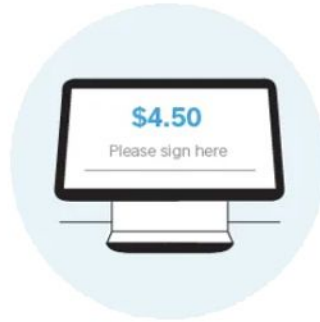

How does a POS system work at a small business?

POS (Point of sale Management System) software developed by **H.R. Software Solutions Pvt. Ltd. (HRSS)**, a leading Professional Systems Integrator with more than a decade. POS is a fully integrated Software which is designed as a complete suite of features that the best Pos software covers, you can have a customize, cheap and user-friendly Software for small, medium and large Industries, POS software is capable of managing every detail, regarding all the industries.

1

A customer decides to buy your product or service

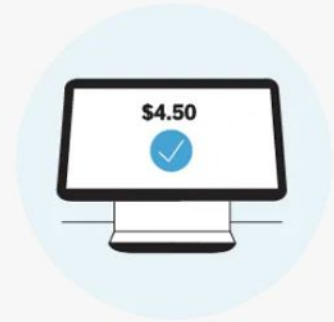

2

Your POS system calculates the price of the item

3

Your customer pays

4

The point-of-sale transaction is finalized

- ✔ A customer decides to buy your product or service. If you have a physical store, they may ask a sales associate to ring them up. That associate could use a barcode scanner to look up the item's price. Some POS systems, such as Square Point of Sale, also allow you to scan items with the camera on your device. For online stores, this step happens when a customer finishes adding items to their cart and clicks the checkout button.
- ✔ Your POS system calculates the price of the item, including any sales tax. Then the system updates the inventory count to show that the item is sold.
- ✔ Your customer pays. To finish their purchase, your customer will have to use their credit card, tap card, debit card, loyalty points, gift card, or cash to make the payment go through. Depending on the type of payment they choose, your customer's bank then has to authorize the transaction.
- ✔ The point-of-sale transaction is finalized. This is the moment when you officially make a sale. The payment goes through, a digital or printed receipt is created, and you ship or hand your customer the items they bought.

Business Controls

Our Modules Features

Product Features

Add Product

Experience the perfect blend of quality, durability, and style with this premium product. Designed to simplify your daily life, it ensures efficiency, reliability, and long-lasting performance. Ideal for both personal and professional use, it adds value, convenience, and a touch of elegance to every task.

Import Products

Discover high-quality imported products crafted for reliability, style, and performance. Perfect for enhancing everyday life, these carefully selected items bring convenience, elegance, and lasting value to your home or business.

Print Barcode/Label

Easily print accurate and professional barcodes and labels. Designed for efficiency and clarity, these prints ensure smooth inventory management, easy identification, and a polished, professional look for your products.

Quantity Adjustments

Easily manage and update product quantities with precision. Ensure accurate stock levels, streamline inventory control, and maintain smooth operations for your business.

Add Adjustment

Quickly add inventory adjustments to keep stock accurate and up-to-date. Simplify tracking, maintain proper records, and ensure smooth inventory management.

Stock Counts

Efficiently track and verify your inventory with precise stock counts. Maintain accurate records, prevent shortages or overstocking, and ensure smooth business operations.

List Sales

Easily view, organize, and manage all your sales in one place. Keep track of transactions, monitor sales performance, and maintain detailed records for better insights and smoother business operations.

POS Sales

Easily record and manage all your POS sales in one place. Track in-store transactions, monitor daily performance, and maintain accurate records for smooth and efficient business operations.

Add Sale

Quickly create and record new sales with accuracy and ease. Streamline your checkout process, capture customer and product details efficiently, and ensure every transaction is recorded in real time for smooth and reliable business operations.

Add Sale by CSV

Easily upload and import multiple sales entries at once using CSV files. Simplify bulk data management, minimize manual errors, and keep your sales records well-organized and fully updated for better tracking and reporting.

Deliveries

Manage and monitor all product deliveries seamlessly in one dashboard. Track order progress, ensure timely dispatch, and maintain clear communication between sales, warehouse, and logistics teams for efficient fulfillment.

List Gift Cards

Access and manage all your issued gift cards in a single view. Track balance usage, activate or deactivate cards, and offer customers a smooth, flexible, and rewarding shopping experience that boosts engagement and loyalty.

Quotation Features

List Quotation

Easily view and manage all your quotations in one organized place. Track quote status, follow up with clients, and convert approved quotations into sales seamlessly for smoother business operations.

Add Quotation

Quickly create professional quotations with detailed pricing and product information. Customize offers for clients, ensure accuracy, and streamline the quotation process for faster conversions and improved efficiency.

Purchase Features

List Purchases

View and manage all your purchase records in one place. Track supplier details, monitor order history, and maintain accurate data to ensure smooth and transparent purchasing operations.

Add Purchase

Easily create and record new purchases with complete details. Keep supplier, product, and payment information organized to maintain accurate records and efficient inventory management.

Add Purchase by CSV

Easily import large volumes of purchase data using CSV files in just a few clicks. Streamline your data entry process, reduce manual errors, save valuable time, and ensure all purchase records are accurate and up-to-date for better inventory tracking and reporting.

List Expenses

Efficiently view and manage all your business expenses from a single dashboard. Track spending across different categories, analyze cost patterns, and maintain clear and organized financial records to support smarter budgeting and informed decision-making.

Add Expense

Quickly record and categorize new business expenses with precision. Keep your financial data well-organized, control unnecessary spending, and maintain accurate reporting to ensure complete visibility and smoother financial management.

Transfer Features

List Transfers

Easily view and manage all your inventory transfers in one organized dashboard. Track transfer status, monitor source and destination locations, and maintain accurate records to ensure smooth stock movement and operational efficiency.

Add Transfer

Quickly create and record new inventory transfers with complete details. Ensure accurate tracking of products between locations, streamline stock management, and maintain up-to-date records for efficient operations.

Add Transfer by CSV

Import multiple inventory transfers at once using CSV files. Simplify bulk data entry, reduce errors, save time, and maintain accurate transfer records for better inventory control and reporting.

Return Features

List Returns

Easily view and manage all product returns in a single dashboard. Track return status, monitor customer or supplier details, and maintain accurate records to ensure smooth processing and efficient inventory management.

Add Return

Quickly create and record new product returns with full details. Streamline the return process, ensure accurate tracking of items, and keep your inventory and financial records up-to-date for better operational efficiency.

List Users

View and manage all system users in one place. Track roles, monitor activity, and maintain organized user records to ensure secure, efficient access and smooth management of your team and system permissions.

Add User

Quickly add new users with complete role and permission details. Streamline user onboarding, maintain secure access, and keep accurate records for smooth operations and proper management of team responsibilities.

List Billers

Easily view and manage all billers from a single dashboard. Track billing activity, monitor contact information, and maintain organized records to ensure efficient financial operations and accurate billing management.

Add Biller

Quickly add new billers with detailed information. Simplify billing management, keep accurate records, and ensure smooth and reliable financial transactions for your business operations and accounting processes.

List Customers

View and manage all customer details in one organized place. Track purchase history, monitor engagement, and maintain accurate records to enhance relationships, improve service, and gain better business insights.

Add Customer

Quickly add new customers with complete contact and account details. Streamline customer management, ensure accurate records, and provide efficient service to enhance engagement and overall business efficiency.

List Suppliers

Easily view and manage all suppliers in a single dashboard. Track orders, monitor contact details, and maintain organized records to ensure smooth procurement, timely deliveries, and effective supply chain management.

Add Supplier

Quickly add new suppliers with full details. Simplify supplier management, maintain accurate records, and ensure efficient procurement processes, timely supplies, and smooth operations for your business.

Settings & Configuration

System Settings

Access and configure all system-wide settings in one place. Manage general preferences, security options, and operational parameters to ensure your business runs smoothly and efficiently according to your requirements.

POS Settings

Customize and manage your Point of Sale system settings. Adjust features, payment options, and interface preferences to ensure smooth in-store transactions and efficient sales operations.

List Printers

View and manage all connected printers from a single dashboard. Track printer status, settings, and configurations to ensure smooth printing of invoices, receipts, and labels without interruptions.

Add Printer

Quickly add and configure new printers with complete settings and options. Ensure accurate, fast, and efficient printing for receipts, labels, and reports, supporting smooth POS operations, inventory management, and seamless business workflows.

Change Logo

Easily update and manage your company logo across the system. Maintain consistent branding on invoices, receipts, emails, and digital platforms to present a professional and cohesive business identity that strengthens recognition and trust.

Currencies

Manage all supported currencies in your system. Set exchange rates, add new currencies, and ensure accurate financial transactions and reporting for international or multi-currency operations.

Customer Groups

Create and manage customer groups for targeted services. Segment customers based on preferences or purchase behavior to offer tailored pricing, promotions, and enhanced customer engagement.

Price Groups

Define and manage different price groups for customers or products with ease. Apply group-specific pricing to streamline sales, ensure accuracy, maintain consistency, and offer flexible pricing strategies for improved business efficiency.

Categories

Organize all products into clear categories for better management and tracking. Improve product searchability, maintain a structured catalog, and simplify inventory handling to ensure smooth operations and efficient stock control.

Expense Categories

Effectively manage and categorize all business expenses. Track spending patterns, analyze costs in detail, and maintain clear financial records to support accurate budgeting, cost control, and smarter decision-making for your business.

Units

Define and manage units of measurement for all products consistently. Ensure precise stock tracking, accurate sales calculations, and reliable inventory management to support efficient day-to-day business operations.

Brands

View and manage all product brands in one organized place. Track brand-specific products, maintain detailed records, and improve reporting and inventory management to enhance operational efficiency and product oversight.

Variants

Easily manage product variants such as size, color, or style. Keep inventory accurate, simplify stock tracking, and provide customers with clear options to improve sales efficiency and overall shopping experience.

Tax Rates

Define and manage tax rates for all products and services accurately. Ensure compliant billing, automate tax calculations, and maintain smooth financial operations to simplify reporting and reduce errors.

Warehouses

View and manage all warehouses and storage locations from a single dashboard. Track stock levels, organize inventory efficiently, and ensure smooth transfers and distribution to maintain seamless operational workflows.

Email Templates

Create and manage professional email templates for automated communication. Maintain consistent branding, streamline customer notifications, and enhance engagement through accurate, timely, and well-structured messages.

Group Permissions

Manage user group permissions effectively to control system access. Define roles, restrict or grant features, and ensure secure, organized operations while maintaining accountability and proper workflow across your team.

Backups

Easily create, schedule, and manage system backups to protect your data. Ensure quick recovery in case of issues, maintain up-to-date secure copies, and support uninterrupted business continuity with reliable backup management.

MIS Reports

Overview Chart

Get a complete visual overview of your business performance in one place. Monitor key metrics, track sales trends, analyze operational data, and gain actionable insights to make informed decisions and ensure smooth day-to-day management.

Warehouse Stock Chart

Visualize stock levels across all warehouses with detailed charts. Track inventory distribution, identify shortages or overstocked items, and maintain efficient stock management to ensure seamless operations and timely product availability.

Best Sellers

Identify your top-selling products effortlessly. Monitor sales performance, understand customer preferences, optimize inventory, and make informed decisions to boost revenue, improve product availability, and enhance overall business performance.

Register Report

Track all cash register activities in detail. Monitor daily transactions, manage balances, detect discrepancies, and maintain accurate financial records to ensure smooth store operations and reliable accounting.

Product Quantity Alerts

Receive timely alerts for products with low or critical stock levels. Stay ahead of shortages, manage inventory effectively, plan replenishments, and ensure uninterrupted sales and operational efficiency across your business.

Product Expiry Alerts

Get notifications for products nearing their expiry dates. Monitor stock quality, reduce wastage, prioritize sales of expiring items, and maintain compliance while ensuring efficient inventory management.

Products Report

Generate comprehensive reports for all products in your inventory. Track stock levels, monitor sales performance, analyze trends, and maintain accurate, organized records to support better decision-making and efficient management.

Adjustments Report

Access detailed reports of all inventory adjustments. Track reasons for stock changes, ensure accurate record-keeping, identify discrepancies, and maintain transparency in inventory management for smoother operations.

Categories Report

Generate detailed reports based on product categories. Analyze category performance, monitor stock levels, and maintain organized records to optimize inventory management and support informed business decisions.

Brands Report

View detailed reports for all product brands. Track brand-specific sales, monitor inventory, analyze performance trends, and maintain organized records to support strategic planning and efficient operations.

Daily Sales

Track and analyze daily sales in detail. Monitor revenue, transactions, and customer activity, identify trends, and make informed operational and strategic decisions to enhance overall sales performance.

Monthly Sales

Access complete sales data in one report. Track transactions, monitor customer activity, analyze trends, and maintain accurate records to improve business insights, optimize operations, and support strategic planning.

Payments Report

View all payment transactions in detail. Track incoming and outgoing payments, ensure accurate financial records, monitor cash flow, and maintain organized data for smooth financial management and auditing.

Tax Report

Generate detailed reports on all taxes applied to products and services. Ensure compliance, track tax amounts, analyze obligations, and maintain accurate records for streamlined financial management and reporting.

Profit and/or Loss

Analyze your business profitability with detailed profit and loss reports. Track revenue, expenses, and costs, evaluate financial performance, and make informed decisions to maximize growth and operational efficiency.

Daily Purchases

Monitor and analyze daily purchases in detail. Track supplier orders, received inventory, and payment information to maintain accurate records, streamline procurement, and ensure efficient stock management.

Monthly Purchases

Generate comprehensive monthly purchase reports. Track supplier activity, analyze inventory inflow, monitor costs, and maintain organized records to support strategic purchasing and efficient operations.

Purchases Report

Access complete purchase data in one place. Track supplier orders, inventory received, payment status, and overall procurement activity to ensure accurate records and optimize purchasing efficiency.

Expenses Report

View detailed reports of all business expenses. Track spending patterns, categorize costs, analyze trends, and maintain organized records to improve budgeting, cost control, and overall financial management.

Customers Report

Generate detailed reports for all customers. Track purchase history, engagement, and preferences to maintain accurate records, improve relationships, tailor marketing efforts, and support informed business decisions.

Suppliers Report

Access comprehensive reports for all suppliers. Monitor orders, deliveries, and transactions, track performance trends, and maintain organized records to ensure smooth procurement and efficient supply chain management.

Staff Report

View detailed reports on all staff activities and performance. Monitor attendance, sales contributions, and operational responsibilities to maintain accountability, improve management, and optimize workforce efficiency.

Modules End

Advantages of POS

POS will help you for easy change from manual to computerized one Minimize hand written work from order to billing information, No Repetition of task, No data redundancy Big time saver and really facilitates proper communication among the management, staff and the employee

- ✓ POS multi location ERP solution
- ✓ Inbuilt database back up facility for safety and reliability
- ✓ Complete system will be available online & offline with centralized data processing
